I.11

Section 205.— ROCK BLASTING

Construction Requirements

205.03 Regulations. Delete the text of paragraph (b) and substitute with the following:

(b) Storage, security, and accountability. Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF), 27 CFR Part 555.

205.04A Blasting Consultant. Provide a blasting consultant as follows:

(a) Use a blasting consultant to:

- (1)** Assist in the blast design.
- (2)** Attend the preconstruction conference.
- (3)** Make on-site inspections during blasting.
- (4)** Make on-site inspection of the blast site before submittal of each blasting plan, and during blasting of test sections.
- (5)** Approve all blasting plans and modifications.

(b) Provide the following to the CO before the preconstruction conference:

- (1)** A resume for the proposed consultant. Include educational background related to blasting, and a detailed resume of experience in the blasting field.
- (2)** A list of at least five highway rock projects, including two projects using non-explosive agents, that demonstrate successfully completed work on which the blasting consultant has worked in the capacity of a consultant in blast design. List a description of the projects, details of the blast plan, and modifications made during the project. List names and telephone numbers of project owners with sufficient knowledge of the projects to verify the submitted information.
- (3)** A cost breakdown of the individual items included in the lump sum blasting consultant item for use in making progress payments.

Based on the documentation provided, the CO will notify the Contractor of the acceptability of the proposed blasting consultant under the terms of the contract.

Revised by Amendment A004

205.05 Blasting Plans. Add the following:

- (a) **General blasting plan..** Delete the text of paragraph and substitute with the following:
Submit a general blasting plan for acceptance at least 30 days before drilling operations begin. Include, as a minimum, the following safety and procedural details;
- (6) Include any measures necessary such as electro shocking and block nets surrounding the blast area to remove or scare fish from the site prior to blasting. Use damage assessment procedures to monitor impacts to fisheries.

205.08 Blasting. General. Add the following:

Do not blast rock into the lake or stream. Use blasting mat when applicable to minimize blast debris scatter.

Use the lowest possible powder factor to accomplish the blasting goals.

Cover all detonation cord on the surface with a minimum of 6 inches of fill.

Do not fire two holes side-by-side simultaneously. Use 25 millisecond delays or more between holes.

Limit the powder factor to one-quarter pound of explosives per cubic yard when air-gapping boulders.

Do not use cap and fuse techniques for blasting.

Blast in accordance with the requirements on Subsection 107.10 (d)(2).

Breaking or reducing boulders by the method of “plastering” or “mud-capping” will not be allowed.

Section 208.— STRUCTURE EXCAVATION AND BACKFILL FOR SELECTED MAJOR STRUCTURES

Payment

208.06 Add the following after the second paragraph:

See Section H for additional requirements. Submit documentation to show how these requirements will be met and include this information in the Spoil and Wastewater Containment Plan.

208.14 Add the following after the second paragraph:

Foundation fill ordered by the CO will be paid for according to the agreed price established in the Contract Modification authorizing the work.

Section 209.— STRUCTURE EXCAVATION AND BACKFILL

Measurement and Payment

209.13 Delete the fourth paragraph and substitute with the following:

Foundation fill ordered by the CO will be measured and paid for according to the method of measurement and agreed price established in the Contract Modification authorizing the work.
